

Gardening by the Moon: A 28-Day Journal for Personal Cultivation

Gardening by the Moon is a tool to help and inspire you to make life-affirming choices for personal transformation. This user-friendly personal self-help journal shows you how to use the phases of the Moon to effect change in your life. Ratnakara guides you on a 28-day journey beginning with the New Moon and culminating at the next New Moon. Each of the four sections of the book addresses the four phases of the Moon as the author helps you discover how to create soul-inspired changes for yourself. You do not need to have much knowledge of Astrology to use this journal; this book only requires, and the author hopes, that you are willing to make positive changes in your life.
