

Coaching and Mentoring

The coaching/mentoring approach is probably the most effective way of helping others to achieve optimum performance in the workplace. Dr MacLennan's book covers the entire subject from basic skills to designing and implementing a tailor-made coaching and mentoring system. He starts by explaining the nature of achievement and the factors that determine it, and then introduces a seven-stage model that will enable managers and supervisors to encourage their people to develop their skills. He examines the problems commonly encountered and shows how to overcome them or, in some cases, turn them to positive account. The book is interactive throughout, using cartoons, humour, self-assessment questions, case studies and illustrations to reinforce the text. A particularly valuable feature is a set of checklists that together summarize the key elements involved. Coaching and Mentoring is, quite simply, a comprehensive manual of the best methods known today of helping people to succeed.
