

## Expanding the Zodiac

One of the most rewarding parts of Astrology is learning about how the Zodiac affects our broader life experiences, known as the Houses of Astrology. These houses represent expanded versions of the signs of the Zodiac, and the sign on the cusp of each house will determine our individual approach to how we react to different kinds of destined experiences. This book is a large excerpt taken from my book titled *Modern Astrology: Through the Houses*, where only information about the houses is included. All of the information contained in *Expanding the Zodiac* is in my other book, though you can find exclusive information on the astrological houses in this book at a discounted price.
